Datawatch Monarch Release Notes

ISSUE ID	RESOLVED ISSUE
MOD-2728	Incorrect file name when in Import Database fields
MOD-2830	Issue with Auto Hide in Export Design
MOD-2922	Cannot print beyond page 9999
MOD-2931	Incorrect behavior after changing report encoding
MOD-2941	Legacy PDF engine is not always used for models with a PDF engine version less than 3.0
MOD-2963	Floating Trap is different from v13.5
MOD-2972	EBCDIC Report is not loaded if encoding is changed to EBCDIC during load process
MOD-2973	Endless loading state for Web reports if connection was lost for a significant length of time
MOD-2997	License Manager should still appear if an instance no longer exists
MOD-3006	Crash when repeatedly attempting to exit from Save Model / Save Project Dialog
MOD-3013	Crash after template is created and saved in certain situations
MOD-3059	Crash on changing field type for Runtime Parameter field
MOD-3065	Crash after certain lookup field changes
NEW FEATURE	Support for importing and exporting SAS Transport Format files (.xpt, .stx)
NEW FEATURE	Dynamic & Static Guides in PDF Options
ENHANCEMENT	Additional conversion options for EBCDIC inputs
ENHANCEMENT	Ignore Print Control Characters is now selected by default for new models
ENHANCEMENT	Ability to remove extraneous space in the left hand margin within PDF Options
ENHANCEMENT	Added encoding options to the context menu on Report View
ENHANCEMENT	Ability to change the order of exports in the Export Job List
ENHANCEMENT	Username and password to configure a License Server connection via silent installation is no longer necessary (License Server 14+)
ENHANCEMENT	Improved Data Scrolling
DATA PREP STUDIO	**(MONARCH COMPLETE ONLY)**
CONN-3	Google Analytics Connection dialog is still enabled even if Plugin Error dialog appears
CONN-31	Salesforce Connector Security Token field is not masked

D DATAWATCH

ISSUE ID	RESOLVED ISSUE
DPS-874	Months abbreviated with periods in Excel files are not recognized as dates
DPS-1653	Preview Data not reflecting recent name edits in Local Library
DPS-1749	Selecting keys when joining causes "add columns for fuzzy" to scroll out of sight
DPS-2022	Scroll position is not maintained in Prep Data when switching between tables
DPS-2104	Split address into parts does not work on a multi-line data item
DPS-2192	Ditto not available on multi-select for date and numeric types
DPS-2247	Set Row as Column Header unable to handle columns with the same name
DPS-2263	Opening a "report" file which is currently locked by another application appears as empty data with no error message
DPS-2271	No data appearing after opening a Monarch Project File containing a PDF input
DPS-2305	Crash when dragging plain text and dropping to an existing table in the Prep Data pane
DPS-2382	Incorrectly generated fieldnames (misspelled month names) when using 'Calendar Month' Pivot Grouping Type
DPS-2391	Calculator column change dialog error
DPS-2415	Filter changes do not show an error when a filter depending on a deleted column is evaluated
DPS-2467	No data in Preview pane when certain XML files are imported
NEW FEATURE	Monarch Table Extractor Add-on - supports extraction of custom tables from documents that are primarily text such as annual financial reports, journals and other reports that contain embedded data. Data can be exported to Data Preparation Studio.
NEW FEATURE	Excel Explorer allows users to discover and apply options for excel sources with mutliple sheets and named ranges quickly and easily
NEW FEATURE	Automatic detection of missing files in a workspace will now prompt the user to update file locations and repair the workspace automatically - simplifies frequent data updates and sharing.
NEW FEATURE	Use Library Table option allows local data sources to be easily swapped with centralized, shareable sources from the Monarch Swarm Library
ENHANCEMENT	Connector enhancements to Impala and MongoDB
ENHANCEMENT	File metadata available for more file types - file name, last modified and created
ENHANCEMENT	Display row counts for each table in a join inside join dialog.
ENHANCEMENT	Allow key recommendation inside join dialog
ENHANCEMENT	Simplify new join creation from Combination Tab
ENHANCEMENT	Allow joining on disparate data types, text-->datetime, text-->numeric
ENHANCEMENT	Change list improvements - drag and drop, add to groups, delete change, validation, undo and redo

DATAWATCH

ISSUE ID	RESOLVED ISSUE
ENHANCEMENT	Preview filters visible in change history
ENHANCEMENT	Metadata columns can be added or removed from Change History
ENHANCEMENT	Load options editable from change history
ENHANCEMENT	Change history pane is resizable, state is preserved between selected tables.
ENHANCEMENT	Message when importing Change List over an existing list
ENHANCEMENT	Replace the decimal separator textbox with a list of valid separators
ENHANCEMENT	Improve error text for Swarm connectivity issues
ENHANCEMENT	Context menu and drop down menu harmonization in the Tables Panel in Prep Data
ENHANCEMENT	Updated connector styling for usability and consistency
ENHANCEMENT	Edit File Path button on Cannot Open File error
ENHANCEMENT	Error messages now visible in grid area
ENHANCEMENT	Improved sample grids in change dialogs
ENHANCEMENT	Warning message to indicate the export maximum of 100k rows in IBM Watson Analytics
