

ISSUE ID	RESOLVED ISSUE
MONARCH CLASSIC	(MONARCH CLASSIC & MONARCH COMPLETE)
MOD-3209	Truncation issue with SUB characters embedded in CSV files
MOD-3214	Crash when .mdb or .acddb is used during a Change Data Source operation
MOD-3222	Unable to see Lookup Field Cleaner dialog in high DPI
MOD-3229	Export Using Command Line Does Not Include Data From External Lookup
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
DPS-2620	Access to path is denied when publishing a Workspace to Monarch Swarm
DPS-3192	Renamed Sort table name in Sort Window is not applied
DPS-3197	Unselecting all the columns when loading a table using a connector still loads all the columns
DPS-3201	Pinned tables are not saved to the correct folder when saving to Monarch Swarm
DPS-3203	Only the first row is saved when publishing a Workspace to Monarch Swarm which contains a XML data source
DPS-3213	Incorrect message stating that a Transform was created using an older version when it was created by the same version
DPS-3215	Crash when an Unknown File Type is dragged into the Prep Data Window
DPS-3216	Crash when dropping a file with an unknown file extension onto Prep Data grid.
DPS-3219	Index out of bounds error when opening a complex workspace created in an earlier version
DPS-3222	Values in a group column are not grouped correctly when using the Fiscal Year grouping type
DPS-3224	Potential deadlock in complex workspace
DPS-3225	The existence of an error in the change list may cause a crash when Create Statistics Table is invoked
DPS-3226	Attempting to edit a broken Sort may cause a crash
DPS-3231	Workspaces with lookup join and inner complement joins fail to upload to Monarch Swarm
DPS-3232	When saving to Monarch Swarm and a workspace fails to finish uploading after a Project has been created, data sources are not cleaned up
DPS-3233	Saving a Workspace to Monarch Swarm fails when attempting to save a Workspace containing Named Exports twice in succession.
DPS-3234	Unexpected Error when invoking "Remove Reports" when multiple reports are selected.
DPS-3243	Different column naming in Monarch Swarm for an empty values set for a Pivot Transform uploaded from Data Prep Studio
DPS-3244	Crash when naming Unpivot, Transpose, Duplicates and Extract Rows transforms with an existing table name
DPS-3246	No way to suppress the auto-generated column suffix introduced in 14.3 when using a Pivot Transform
DPS-3255	Report Discovery should respect the IgnoreLowAscii Monarch registry setting
DPS-3256	Truncation issue with SUB characters embedded in CSV files

ISSUE ID	RESOLVED ISSUE
DPS-3258	Sort Checkbox is missing in the Pivot Transform
DPS-3269	The OK button in the Save workspace to Monarch Swarm dialog is initially disabled.
DPS-3327	Export options are unavailable for a Workspace uploaded from Data Prep Studio which contains Named Exports
DPS-3329	Reinstate the Angoss export
ENHANCEMENT	Improved error reporting for Monarch Swarm Workspace upload issues.
ENHANCEMENT	Custom format preservation for date and numeric columns when uploading a Workspace to Monarch Swarm

ISSUE ID	RESOLVED ISSUE
MOD-2744	Crash when adding a formula field when connected to Excel or Access lookups and Office 2016 MSI is installed.
MOD-2841	Overly large calendar in Table Design - Lookup fields.
MOD-3083	FirstDay function returns the first day of the current calendar year.
MOD-3097	Runtime Parameter Not Being Applied When Model Is Opened/Loaded
MOD-3127	Error when opening 0KB files via UNC path/Network path
MOD-3135	Summary Export to Excel not Exporting a Column with Blank Header
MOD-3136	Crashing When Opening Summary Wizard when Office 2016 MSI is installed.
MOD-3159	Table not found Error Opening XLS file with Modern engine
MOD-3162	Crash when using Define & Import for a DPS workspace
MOD-3163	Report verify misses some failures when there are multiple failures on a line.
MOD-3173	Check Out License' button does not hide after successful check out.
MOD-3183	Field Size Not Saved Or Respected When Exporting To Access.
MOD-3192	Unicode Compression Not Set When Creating Access Database.
NEW FEATURE	"Modern" Engine for Excel Inputs - supports larger files and more than 255 columns (Monarch Classic & Data Prep Studio)
NEW FEATURE	LargeAddressAware version available - allows more than 2GB memory usage with 32-bit Monarch (Monarch Classic & Data Prep Studio)
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
DPS-1122	Missing connector name when accessed from Edit Table Info.
DPS-1123	Expand or resize of Report columns in Edit Table Info - Datawatch Server - Content is not working as expected.
DPS-1651	Google Analytics Reported Values incorrect.
DPS-1677	Table Info does not refresh automatically for OData and Datawatch Server.
DPS-1695	Google Analytics Date Syntax not enforced.
DPS-1704	Salesforce Objects table not sorted.
DPS-2140	Salesforce Connector Security Token field is not masked.
DPS-2206	Performance issues with Excel Extended Mode initial load using large data.
DPS-2242	Datawatch Server - Content Connector dialog is hidden after clicking browser.
DPS-2245	Date pattern in conversion options "apply to existing" not applying to Report Discovery sources.
DPS-2277	Table name of Salesforce tables in Preview Data is 'Salesforce Object Table' for all tables opened.
DPS-2412	No tables are displayed in Preview when loading Excel files via Load Selected button in Excel Explorer.
DPS-2466	Swarm Library not opened if it contains a large number of data sources (more than 1000).
DPS-2472	Load Tables button operates on all tables in all databases for certain data sources.

ISSUE ID	RESOLVED ISSUE
DPS-2505	Unformatted error message with an incorrect Swarm URL in Application Settings.
DPS-2506	Progress bar for Access export jumps to 20% then stops.
DPS-2508	Unnecessary 'Load Options' item in pinned table.
DPS-2510	Dragging a Rename change list to a column not working.
DPS-2601	Selecting columns with trailing spaces in names shows an "invalid term" error.
DPS-2618	Unable to append data to a protected Sheet in an XLSX file.
DPS-2668	Deduplicate transform error in specific circumstances.
DPS-2711	Unnecessary error message appears when hiding preview then loading table using Excel file.
DPS-2713	Can't drag and drop a HTML file to a Monarch model node.
DPS-2714	Median not calculated properly on Group By Transform.
DPS-2726	Monarch Model with Suppress Left Whitespace enabled not working.
DPS-277	No default port in Informix connector dialog.
DPS-2772	Crash when editing Column Name then moving focus to Column dropdown icon.
DPS-2787	Crash when opening non-.dpwx file via Open Workspace.
DPS-2797	Typo in interactive help for Append Helper dialog box.
DPS-2798	No options for Negative Joins in Show Join Analysis.
DPS-2799	Crash when Row Count of Join Config dialog becomes 0 and you proceed with combining data.
DPS-2806	Inconsistent number of rows between XML Explorer preview and Preview Data.
DPS-2816	Error when exporting data to Excel using imported format of Date/Time.
DPS-2893	Option "Set Row as Column Headers" crashes when the row contains an empty column after Ditto function applied.
DPS-2909	Tablet PC Settings -> Other -> Handedness affects pop down menus adversely.
DPS-2923	Missing records when loading XML file with duplicated nested tags.
DPS-2983	Incorrect behavior when applying change list - Converting Numeric to Text to formatted values.
DPS-2997	Unsuccessful append of table using Export as Microsoft Excel using the input source file.
DPS-3069	External Table is not in the expected format error when opening Excel file with control character in column header row.
DPS-3140	MS-Access passwords not uploaded properly when saving Workspaces to Swarm.
DPS-3169	Incorrect icon for Edit Load Options in Change History panel.
DPS-551	Unable to select different folder when one is already selected in Business Objects Universe connector.
DPS-676	"Optional feature not implemented" error when opening certain tables in Oracle.
DPS-1984	Values are not redacted when using an imported Monarch model.
NEW FEATURE	Redaction

ISSUE ID	RESOLVED ISSUE
NEW FEATURE	Trigonometric and Geospatial Functions
NEW FEATURE	Monarch Classic-style Lookups
NEW FEATURE	Negative Inner Join
NEW FEATURE	Transpose Transformation
NEW FEATURE	Named Exports
NEW FEATURE	Statistics Snapshots
ENHANCEMENT	Improved support for Monarch Models.
ENHANCEMENT	Option to refresh all data sources.
ENHANCEMENT	Encoding override options for XML, HTML, JSON & CSV.
ENHANCEMENT	Ability to export to Excel without column headers.
ENHANCEMENT	Help to resolve Transforms which become invalid.
ENHANCEMENT	Various styling and other UI enhancements.
ENHANCEMENT	Group By enhancements
ENHANCEMENT	Duplicate Handling Transformation
ENHANCEMENT	Extract Rows Transformation

ISSUE ID	RESOLVED ISSUE
MOD-3027	PDF metadata is not flushed when closing a model or project
MOD-3044	Data not extracted when an <zip> trap from an old version of Monarch exists
MOD-3070	.XLSM file containing sorts may become corrupted when adding data
MOD-3079	Error appears when entering a very long path in Options
MOD-3080	Slow export speed when exporting to Access using the "Add data to table" option even if the file is to be overwritten
MOD-3096	Error when evaluating multiple external lookups: "The multi-part identifier "<NAME>" could not be bound."
MOD-3104	Unable to swap Tab Delimited input file with an already loaded file of identical structure without metadata loss
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
CONN-58	SalesForce Plugin: Incorrect Table result
CONN-54	IBM Cloudant: Values in Text Columns are quoted
DPS-2724	Crash after performing a Join under certain circumstances
DPS-2720	Crash when attempting to remove a change from a group
DPS-2659	Loading large tables from a Swarm library may fail
DPS-2596	Error when editing an imported Format Column change for a Date/Time column
DPS-2594	Hang when closing a workspace whilst a large transform is running
DPS-2592	Crash when deleting a column under certain conditions
DPS-2542	Crash when deleting a path reference in the Edit File Path dialog
DPS-2541	Add All files (*.*) option in Open dialog via Edit File Path (Browse) option
DPS-2538	Excel Explorer may cause a hang
DPS-2536	Exception Upon Closing the Application In Some Unusually Configured Environments
DPS-2528	JSON file doesn't load when opened using Open Data
NEW FEATURE	License Expiry Notification for Subscription and other time-limited licenses
NEW FEATURE	Support Import and Export of SAS Transport Format files

ISSUE ID	RESOLVED ISSUE
<i>ENHANCEMENT</i>	Improved behavior when using multiple monitors
<i>ENHANCEMENT</i>	Improved drag and drop behavior when using the change list

ISSUE ID	RESOLVED ISSUE
MOD-2728	Incorrect file name when in Import Database fields
MOD-2830	Issue with Auto Hide in Export Design
MOD-2922	Cannot print beyond page 9999
MOD-2931	Incorrect behavior after changing report encoding
MOD-2941	Legacy PDF engine is not always used for models with a PDF engine version less than 3.0
MOD-2963	Floating Trap is different from v13.5
MOD-2972	EBCDIC Report is not loaded if encoding is changed to EBCDIC during load process
MOD-2973	Endless loading state for Web reports if connection was lost for a significant length of time
MOD-2997	License Manager should still appear if an instance no longer exists
MOD-3006	Crash when repeatedly attempting to exit from Save Model / Save Project Dialog
MOD-3013	Crash after template is created and saved in certain situations
MOD-3059	Crash on changing field type for Runtime Parameter field
MOD-3065	Crash after certain lookup field changes
NEW FEATURE	Support for importing and exporting SAS Transport Format files (.xpt, .stx)
NEW FEATURE	Dynamic & Static Guides in PDF Options
ENHANCEMENT	Additional conversion options for EBCDIC inputs
ENHANCEMENT	Ignore Print Control Characters is now selected by default for new models
ENHANCEMENT	Ability to remove extraneous space in the left hand margin within PDF Options
ENHANCEMENT	Added encoding options to the context menu on Report View
ENHANCEMENT	Ability to change the order of exports in the Export Job List
ENHANCEMENT	Username and password to configure a License Server connection via silent installation is no longer necessary (License Server 14+)
ENHANCEMENT	Improved Data Scrolling
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
CONN-3	Google Analytics Connection dialog is still enabled even if Plugin Error dialog appears
CONN-31	Salesforce Connector Security Token field is not masked

ISSUE ID	RESOLVED ISSUE
DPS-874	Months abbreviated with periods in Excel files are not recognized as dates
DPS-1653	Preview Data not reflecting recent name edits in Local Library
DPS-1749	Selecting keys when joining causes "add columns for fuzzy" to scroll out of sight
DPS-2022	Scroll position is not maintained in Prep Data when switching between tables
DPS-2104	Split address into parts does not work on a multi-line data item
DPS-2192	Ditto not available on multi-select for date and numeric types
DPS-2247	Set Row as Column Header unable to handle columns with the same name
DPS-2263	Opening a "report" file which is currently locked by another application appears as empty data with no error message
DPS-2271	No data appearing after opening a Monarch Project File containing a PDF input
DPS-2305	Crash when dragging plain text and dropping to an existing table in the Prep Data pane
DPS-2382	Incorrectly generated fieldnames (misspelled month names) when using 'Calendar Month' Pivot Grouping Type
DPS-2391	Calculator column change dialog error
DPS-2415	Filter changes do not show an error when a filter depending on a deleted column is evaluated
DPS-2467	No data in Preview pane when certain XML files are imported
NEW FEATURE	Monarch Table Extractor Add-on - supports extraction of custom tables from documents that are primarily text such as annual financial reports, journals and other reports that contain embedded data. Data can be exported to Data Preparation Studio.
NEW FEATURE	Excel Explorer allows users to discover and apply options for excel sources with multiple sheets and named ranges quickly and easily
NEW FEATURE	Automatic detection of missing files in a workspace will now prompt the user to update file locations and repair the workspace automatically - simplifies frequent data updates and sharing.
NEW FEATURE	Use Library Table option allows local data sources to be easily swapped with centralized, shareable sources from the Monarch Swarm Library
ENHANCEMENT	Connector enhancements to Impala and MongoDB
ENHANCEMENT	File metadata available for more file types - file name, last modified and created
ENHANCEMENT	Display row counts for each table in a join inside join dialog.
ENHANCEMENT	Allow key recommendation inside join dialog
ENHANCEMENT	Simplify new join creation from Combination Tab
ENHANCEMENT	Allow joining on disparate data types, text-->datetime, text-->numeric
ENHANCEMENT	Change list improvements - drag and drop, add to groups, delete change, validation, undo and redo

ISSUE ID	RESOLVED ISSUE
ENHANCEMENT	Preview filters visible in change history
ENHANCEMENT	Metadata columns can be added or removed from Change History
ENHANCEMENT	Load options editable from change history
ENHANCEMENT	Change history pane is resizable, state is preserved between selected tables.
ENHANCEMENT	Message when importing Change List over an existing list
ENHANCEMENT	Replace the decimal separator textbox with a list of valid separators
ENHANCEMENT	Improve error text for Swarm connectivity issues
ENHANCEMENT	Context menu and drop down menu harmonization in the Tables Panel in Prep Data
ENHANCEMENT	Updated connector styling for usability and consistency
ENHANCEMENT	Edit File Path button on Cannot Open File error
ENHANCEMENT	Error messages now visible in grid area
ENHANCEMENT	Improved sample grids in change dialogs
ENHANCEMENT	Warning message to indicate the export maximum of 100k rows in IBM Watson Analytics

ISSUE ID	RESOLVED ISSUE
MOD-682	Redaction is always enabled for XMOD models.
MOD-2618	Descriptions for user defined functions are not displayed
MOD-2660	External Lookup does not load when report file is dragged or manually opened
MOD-2706	Pivot Field dialog closes with empty custom name field
MOD-2709	Excel error when exporting Pivot Table with Report Filters only
MOD-2722	Issue with duplicate column names for Lookup field
MOD-2747	Error on 'Create All Cache Databases'
MOD-2748	No error when Internal cache database size exceeded
MOD-2752	Cannot save a file to remote zip archive
MOD-2753	Error on opening project from password protected archive
MOD-2754	Performance issues when opening files from web archive
MOD-2759	Cannot load table via RedShift ODBC connector
MOD-2761	Warning when opening a DPS workspace file from a web location
MOD-2762	.dpwx file is not recognized as a database (Open - All file types - Web)
MOD-2768	High memory consumption when importing values for Lookup field
MOD-2776	Subscription Expiry dialog appears when switching to Classic mode (Hide this warning message.. is checked)
MOD-2792	Crash when a circular reference is created whilst editing a calculated field
MOD-2802	Open from Web not working with Access file for various file sharing services (S3, Sharepoint)
MOD-2804	Summary key sort selection not always persisted
MOD-2812	'After key value change' settings are not disabled in some cases when they should be
MOD-2813	'Insert page break when printing' does not work for the first print event
MOD-2814	Summary printing is not correct when hidden key has header or subtotal line
MOD-2817	Crash When A Summary Has A Very Large Number Of Frozen Rows
MOD-2824	Summary Export to Excel With Certain Combinations Of Merged Causes Excel To Repair The Workbook
MOD-2825	Footer layout has incorrect title in Summary design
MOD-2826	'Embed Page setup header ...' option in export issue
MOD-2829	Monarch Utility:Under certain conditions with large numbers of identical strings, not all strings are replaced
MOD-2832	Scrolling to the far right Template Editor may cause a crash
MOD-2833	Erroneous Error Message when Exporting more than 255 fields to XLSX/XLSM.
MOD-2834	'Ctrl + A' is not working in Expression area
MOD-2835	PDF import options are missing when using "Open with Monarch"

ISSUE ID	RESOLVED ISSUE
MOD-2836	Summary export issues for Tableau and Qlikview when the summary has hidden fields
MOD-2839	Monarch crashes after deleting the field selected for Lookup (Input values are specified)
MOD-2840	Monarch crashes after deleting the field selected for Value based filter (values are specified)
MOD-2846	Incorrect message in Validation Results dialog for Value Based Filter
MOD-2855	Source file can't be opened from password protected archives
MOD-2866	Find in Table does not highlight the whole line in Table
MOD-2868	Table naming is not applied if File naming is not specified
MOD-2871	Error when trying to open nonexistent zip file
MOD-2875	'Auto-detect from file name' option should be chosen if the default extension is not applicable for the export
MOD-2878	Database files do not have file extensions in the application title
MOD-2882	Character List Trap position issue if report is scrolled horizontally.
MOD-2889	Keyboard shortcut issues
MOD-2893	'Resolving Missing Files' dialog does not appear opening a project interactively via a command line
MOD-2902	Issue with multiple reports open
MOD-2905	Some changes of model are not applied to all reports
MOD-2918	Can't save 2nd Project if default storage is s3 + Crash
MOD-2924	Find in Table: the line is hidden because of Search properties
MOD-2925	QAT items added via default dropdown list disappear after application restart
NEW FEATURE	Support for EBCDIC-encoded files
NEW FEATURE	Go to Row / Column
ENHANCEMENT	Performance Enhancement: Fewer Data Rebuilds When Editing Models
ENHANCEMENT	Performance Enhancement: Retrieving List of Values for Lookup Fields
ENHANCEMENT	Additional functions (Export, Export selected files, File information) for Report Selector Context Menu
ENHANCEMENT	Additional functions (Quick Export, Rebuild, Add Lookup, Model & Project Info & Audit Trail) for Table Selector Context Menu
ENHANCEMENT	Additional functions (Quick Export, Duplicate, Rename, Rebuild, Move Up/Down/Top/Bottom) for Summary Selector Context Menu
ENHANCEMENT	Explicitly define and store the transformation codepage in the model
ENHANCEMENT	Export text files to specific codepages

ISSUE ID	RESOLVED ISSUE
ENHANCEMENT	Spaces in autogenerated table names are now automatically replaced with underscores
ENHANCEMENT	Set the sort order for row labels when creating Excel Pivot Tables
ENHANCEMENT	Remove items from Most Recently Used (MRU) lists via right-click
ENHANCEMENT	Show data types for columns when defining external lookups
ENHANCEMENT	Updated PDF container engine
ENHANCEMENT	Open SAP AIS files as Database Input
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
DPS-1757	Fixed preview filter scrolling for large record sets.
DPS-1758	Apply Filter popup is now resizable
DPS-1760	Command buttons order changed for consistency with Guided Help always left most icon
DPS-1762	Resolved crash when error is encountered using ODBC connector
DPS-1763	Inconsistency on startup folder for Monarch vs. DPS
DPS-1768	Fields are missing when using keyboard navigation in Edit Sort dialogs
DPS-1769	Resolved crash when attempting to search a non-existing table and clicking OK
DPS-1770	Resolved crash when editing duplicate transform - Object reference not set to an instance of an object
DPS-1771	Switching duplicate transform shows unusable listbox
DPS-1779	Change default table name when using Do Not Aggregate as Group By transform.
DPS-1780	Added missing descriptions for operators in the help for Group By
DPS-1827	Updated window size for Search and Replace operations when data has very long long strings
DPS-1855	Corrected Column names in Define & Edit sort dialog that were not refreshing
DPS-1856	DPS Sort does not function properly when sorting null values
DPS-1866	Added Sorting capability for Sorted Transform Load Plans
DPS-1870	Resolved issue related to opening Access file from Sharepoint
DPS-1878	Resolved Crash when dragging change history to a table
DPS-1973	Selected table changes after using Discard function
DPS-1986	Column sorting - DPS has a different result compared to Monarch Classic
DPS-1728	Previewing sends duplicate SQL Statement requests
DPS-2096	Back button of Datasource Library guided help pop-up dialog is disabled but clickable
DPS-1710	Should not be able to export to Watson Analytics if table name exceeds 256 characters

ISSUE ID	RESOLVED ISSUE
DPS-1687	Fixed SFDC Connector not showing report date/time fields
DPS-920	Disable Excel/Plugin Load Options Ok button when value is not valid
DPS-926	Updated Calculated Field: FirstDay(,) and LastDay(,) function descriptions that were incomplete
DPS-1077	Updated Multi-Column for Convert Num to Text
DPS-1175	Fixed wrong tool tip in Change List with Apply Filter
DPS-1236	Added focus/highlight to active docked table on the left pane table icons
DPS-1311	Fixed display of Recent Tables list not showing all loaded tables
DPS-1420	Updated for duplicate Phrase in MBK is allowed without clicking the ADD button
DPS-1530	Set Row as Column Headers should be disabled when multiple rows are selected.
DPS-1690	Resolved Crash working with Guided help
DPS-1549	Changed context menu 'Copy with headers' to 'Copy with Headers'
DPS-1537	Changed title of Edit source row limit dialog to "Edit Source Row Limit"
DPS-1630	Updated About page of Monarch IBM Analytics
DPS-1634	Fixed zoom in Prep Data that was not persisting
DPS-1645	Fixed error when loading JSON file - Object reference error when trying to preview or load
DPS-1650	Fixed Guided Help is not displayed properly when dialog is maximized
DPS-1652	Updated Salesforce Connector dialog for entry of password and token
DPS-1672	Filter on preview screen not handling long text well
DPS-1686	'First Row Has Column Name' feature is not applied in the table preview if the tickbox is unchecked during the loading of data
DPS-2157	Resolved crashes when the "Edit Transform" of SetColumnHeaders-transformed table is clicked
DPS-1782	Fixed issues preventing renaming table after transform for Undocked window
DPS-1240	Fixed issue preventing undocking multiple tables at the same time
DPS-1759	Updated filter type descriptions when accessing from filter command button
DPS-1056	Tooltip displays for the first table even if text is complete
DPS-1562	Show Duplicated Selected Columns Lists All Columns on Edit
NEW FEATURE	Export to Monarch Swarm
NEW FEATURE	Export to Tableau Server
NEW FEATURE	Password protection for DPS workspaces

ISSUE ID	RESOLVED ISSUE
NEW FEATURE	Monarch Swarm Library. Appears as a new tab in the existing Library allowing users to share data sources and tables using Swarm collaboration.
NEW FEATURE	Partial support for reading Monarch Classic Models and Projects
NEW FEATURE	Monarch Node Table Type. Allows a report to be mined in Report Discovery and then multiple reports can be added to the table view in Prep Data.
ENHANCEMENT	Redesigned Dedup Transform
ENHANCEMENT	Simplified Excel Exports, only including the worksheet
ENHANCEMENT	Optimized auto-generated tablenames
ENHANCEMENT	Ditto may now be used on all data types
ENHANCEMENT	Filtering auto-collapse in preview data
ENHANCEMENT	Save Icon
ENHANCEMENT	Improved Recent Objects list
ENHANCEMENT	Salesforce Connector supports TLS 1.1 or greater - required for connections as of March 2017
ENHANCEMENT	Move columns using drag/drop in Prep Data view
ENHANCEMENT	Reordered Export Icons
ENHANCEMENT	Preview Data is reloaded when opening workspaces from a previously saved state
ENHANCEMENT	Rows automatically resized for multi-line data values
ENHANCEMENT	Add More Stuff icon available in Prep Data view
