

ISSUE ID	RESOLVED ISSUE
MONARCH CLASSIC	
MOD-2637	'f' + 'i' in PDF reports sometimes recognized as latin small ligature 'fi'
MOD-3201	Rotated PDF only works with 3.0 PDF Engine
MOD-3340	Alignment of column value in PDF Import Options does not translate to Report View
MOD-3405	Summary 'All Others' values may be incorrect when using more than one 'First N' down keys.
MOD-3424	Not Possible To Push All Fields Right if the caret is in the first character position
MOD-3439	If "Prefetch files from network drive" is enabled, temporary report copies in the specified directory are not deleted after application exit
MOD-3440	Crash in Database Design if the Data Table Preview is still loading
MOD-3442	Substring Exception occurs during Export
MOD-3450	Intermittent error - Invalid object name DBO_... Under certain conditions
MOD-3456	Enable/Disable Append DOS start-of-file character
MOD-3483	Crash with Exception "Empty path name is not legal"
NEW FEATURE	Support scientific notation input when converting a column from text to numeric
ENHANCEMENT	Focus Table View on newly created Calculated Field After Creation
ENHANCEMENT	Display theme can be controlled via registry setting
DATA PREP STUDIO	
DPS-2335	Disambiguate Change Group Names On Creation
DPS-3229	Data from the Informix connector is not loaded and displayed correctly in the preview grid
DPS-4221	Performance of Prep Data table list becomes sluggish for Workspaces containing deeply nested table trees
DPS-4307	Crash encountered when scrolling the columns in ANALYZE tab under certain conditions

ISSUE ID	RESOLVED ISSUE
DPS-4362	Shrinking the Append canvas results in rendering issue
DPS-4405	Deleted tables within Google Sheets are shown (located in Trash folder)
DPS-4406	Cannot open Google Sheet if the tablename contains more than 127 characters
DPS-4459	Login successful even if the username and password is incorrect for Amazon EMR
DPS-4483	Numeric values have a prefix "F" when saved to Knowledge Hub
DPS-4496	Cannot open Excel files using Google Sheets connector (G Suite)
DPS-4514	Complex Workspace is very slow to open
DPS-4579	No "working" indicator when retrieving Google Sheet data
DPS-4603	Conversion from text to date fails when using comma as decimal separator in PDF Table Extractor
DPS-4610	Error messages show the same message in multiple message boxes within the connector window
DPS-4618	Logging-in using the wrong user name in the Active Directory connector displays the list of the tables instead of an error message
DPS-4619	Superfluous 'ActiveDirectory.' in table names for the Active Directory connector
DPS-4636	Append panel does not show tooltip when dragging multiple tables which are already related to each other
DPS-4639	Knowledge Hub not respecting case sensitivity for Group By transforms when publishing a Workspace
DPS-4641	Error message shown when opening Monarch Public
DPS-4649	Adding a metadata column causes a crash if the table is in an error state
DPS-4667	Crash when deleting one staged table in Append panel and then removing the other one from the Append panel
DPS-4669	Table items shrink to zero width when the tree is deeply nested enough and the Table panel is small.
DPS-4670	Display issues with tree connector lines when scrolling nested table tree
DPS-4685	Crash when clicking on "Manage Summaries" and clicking "Edit" using a Table with an invalid definition
DPS-4687	Preparing underlying table under a Summary does not refresh available Summaries until the user switches tables
DPS-4714	Connection Failed When Connecting to a Business Objects Environment
DPS-4751	Trap and field horizontal scrolling getting out of sync with report panel
DPS-4758	Delimited text - Clicking on Edit Load Options causes a crash if the table is currently in an error state
DPS-4763	Hubspot connection encounters script errors during OAuth login
DPS-4780	Pressing the escape key in Report Design places a control character in the trap mask
DPS-4783	Vertical scroll bar in report viewer gets clipped when the window is sufficiently small

ISSUE ID	RESOLVED ISSUE
DPS-4814	Sample text doesn't scale with report while regex is active
DPS-4817	Paste in trap editor erases one too many characters
DPS-4820	Using trap character buttons to insert trap characters does not add an undo state
DPS-4821	Trap editor loses focus after click of trap character buttons
DPS-4822	Red lines on negated characters in the mask are rendered too low
DPS-4824	Trap editor can lose focus after hitting trap character buttons
DPS-4832	Crash with error message: Specified method is not supported if viewing the table and attempting to Open in Classic Mode
DPS-4852	Group Transform dialog's error indicator is shown when there is no error and hidden when there is an error
DPS-4853	Report Verify view enabled while there are no fields defined
DPS-4892	System.AggregateException error occurs under certain conditions when using a Summary
DPS-4893	Error saving preferences if the %LOCALAPPDATA%\Datawatch_Corporation ... folder and the user-config file within is inaccessible
DPS-4894	Difference in behavior when deleting an imported Change list
DPS-4903	The tooltip for the error box for connectors is truncated when the error is too long.
DPS-4933	Changing the user ID or password of an ODBC DSN connection after successfully connecting crashes the application
DPS-4957	Clicking "Edit in Report Design" does not work on a Report File node when done through the right click context menu
DPS-4960	Scroll synchronization breaks for the Report View when viewing the Document Options
DPS-4968	Clicking close on silent videos minimizes the main window
DPS-5001	Pinned table with numeric values have 2 decimal places when saved to Altair Knowledge Hub
DPS-5004	Group By encounters errors on datasets >750,000 rows
DPS-5006	Red validation error around Encoding Options in Report Design when UTF-8 is set as the default encoding.
DPS-5079	Automatically handle credential aggregation for import types previously using the aliasing system
DPS-5085	Index out of bounds error using a particular file
DPS-5086	Cannot open some password protected tables from projects imported from Monarch Classic
DPS-5092	Log file reports incorrect version of Windows
NEW FEATURE	JIRA, Zendesk and Box (Metadata) Connectors added

ISSUE ID	RESOLVED ISSUE
NEW FEATURE	Support scientific notation input when converting a column from text to numeric
NEW FEATURE	Server-side filtering for certain Connectors
ENHANCEMENT	Force all columns to text for Excel sources
ENHANCEMENT	Delimited Text data type detection options
ENHANCEMENT	Redesigned Context Menu & Search
ENHANCEMENT	Summary enhancements
ENHANCEMENT	Append Helper redesign
ENHANCEMENT	Performance enhancements in Table Panel and various UI areas
ENHANCEMENT	Settings redesign
DEPRECATION	IBM Watson Analytics export has been removed, due to withdrawal of the product by IBM
LICENSING	
LA-366	Invalid or corrupted License File error on machine with custom date format settings
LA-364	No option to change user credentials when using Knowledge Hub licensing
NEW FEATURE	Support for Altair Hyperworks Units licensing
