

ISSUE ID	RESOLVED ISSUE
MONARCH CLASSIC	(MONARCH CLASSIC & MONARCH COMPLETE)
MOD-3089	Increase Character field length to 255 so Varchar(255) is deemed a character field for V11 compatibility
MOD-3197	Cannot delete an invalid external lookup.
MOD-3204	PDF files do not open in open dialog grid sort order when using multiple selection
MOD-3207	Illegal Name syntax error message when trying to export to existing excel worksheet is unhelpful
MOD-3223	SdkDocInfo.Tolso8601DateTime Exception when opening PDF file created by Monarch
MOD-3237	Cannot open text files as a database (or external lookup) if blank rows exist at the start of the file
MOD-3241	Certain Negative signs are not recognized in PDF files
MOD-3297	Crash when loading a 3.4GB text report and model file
MOD-3334	Duplicate user-defined functions appear in Functions list
MOD-3342	Export fails when appending to an existing Access file and table
MOD-3346	Incorrect labels on the Offline Deactivation Page
MOD-3365	Support for ISO 19770-2 SWID tags
MOD-3366	Monarch should open data from pinned tables in DPS workspaces without testing the source connection.
MOD-3367	Strongly Linked Functions Fail To Load If External Model Is Read-Only
MOD-3369	Ability to override the value of the TEMP and TMP environment variables with the value in the Workpath registry setting
MOD-3374	Add a download to CSV function to the Table Design Field List
ENHANCEMENT	Report Chunking - the ability to process very large reports in smaller chunks.
ENHANCEMENT	Ability to download the contents of the Field List to CSV
ENHANCEMENT	Ability to override the value of the TEMP and TMP environment variables with the value in the Workpath registry setting

ISSUE ID	RESOLVED ISSUE
DATA PREP STUDIO	(MONARCH COMPLETE ONLY)
DPS-1554	Failed to load image error appearing in log file
DPS-1831	Poor performance when populating filter values
DPS-1880	Filtering Data by Range - data doesn't refresh automatically when using the Advanced Options without 'editing' the range value first
DPS-1882	Range filter type is not working as expected
DPS-1901	Maintain argument default compatibility with Monarch Classic for the STR function
DPS-1963	Syntax error encountered when searching for a non-existent table name
DPS-2136	Incorrect Amount of Columns Defined If CSV Data Structure Significantly Changes Beyond 1000 Rows
DPS-2854	Some records are not visible after refreshing table
DPS-2915	Unexpected data format after Remove Decimals operation
DPS-3317	Missing vertical scroll bar in Excel Options dialog box
DPS-3362	Disable column suffix checkbox should be disabled if multiple aggregation types are selected
DPS-3444	Export list order should reflect the sort order in Prep Data
DPS-3864	Incorrect number of decimal places may be shown when extracting data from PDF files
DPS-3877	Report Verify does not perform "adjust all fields" consistently with Monarch Classic for floating traps
DPS-3928	Report Design leaves residual temporary files when converting a PDF.
DPS-4051	Using the arrow while in the mask editor should force everything to scroll when reaching the horizontal limit
DPS-4199	Summary-related dropdowns appear in Export Table as CSV (Named Export)
DPS-4206	Temp file created when opening Report Design (*.index.dat) is not deleted
DPS-4224	Google Big Query is displayed instead of "Google BigQuery"
DPS-4244	The query value is not saved in the Connection dialog from Load Options > Edit Table Info
DPS-4249	Segment Temp Files generated but not getting deleted when doing Join
DPS-4262	IBM Cloudant Connection dialog's size is not fixed
DPS-4269	Ok button does not disable in Splunk when editing connection
DPS-4276	Renaming columns whilst on the Analyze tab does not re-calculate which Summaries can be applied to the selected table
DPS-4288	Support for Sharepoint Online in Open Data

ISSUE ID	RESOLVED ISSUE
DPS-4289	Export fails when appending to an existing Access file and table
DPS-4292	Error encountered when selected table has no rows.
DPS-4299	Workspace crashes when trying to edit a report in Report Design
DPS-4301	Default state of blank workspace parameter preventing user from clicking OK after selecting an application runtime parameter
DPS-4302	Error encountered when selecting a specific table using DB2 connector
DPS-4303	Duplicate message in error message window for Vertica
DPS-4308	Crash when trying to load data from Public Library
DPS-4325	Crash after entering an incorrect password (5x) for a password-protected data source
DPS-4336	Export may hang on sequential retries
DPS-4345	Crash encountered when selecting a destination folder that has a problem with a Swarm connection
DPS-4348	Report Verify displays an error but the corresponding field is not highlighted.
DPS-4363	Trapping controls getting out of horizontal scrolling sync on some wide reports
DPS-4364	Report shows up blank the second time you go into report design
DPS-4365	When loading data in the query tab preview data option, the row limit is not applied.
DPS-4371	Preview Data and OK buttons are greyed out when loading Object Tables from a Salesforce data source containing high number of fields
DPS-4385	Looping validation alert when editing a Google Analytics connection with an error
DPS-4389	Missing Alt key for File >> Open Data menu option
DPS-4420	OAuth windows prompt excessively
DPS-4423	Using Alt shortcuts to access the application menu keeps it open unnecessarily after selection is made
DPS-4424	On workspace open, DPS asks for PDF password on missing file which would normally not require a password
DPS-4431	Ctrl+mouse wheel should zoom the report viewer in Report Design
DPS-4432	Clearing templates not functioning in the same way as Monarch Classic
DPS-4439	Export tree is displayed incorrectly when prep data tree has sort applied.
DPS-4440	Regex character insertion performance degrades as it grows in length
DPS-4441	Making a filter on a runtime parameter column causes the Prepare grid to go blank and causes further errors
DPS-4442	Blank report view presented when dragging certain PRN files into the product
DPS-4447	Crash on click to append when source tables have invalid file paths

ISSUE ID	RESOLVED ISSUE
DPS-4449	Filter does not rebuild automatically when a runtime parameter value upon which the filter depends is changed
DPS-4474	Crash when typing value in template width that is greater than report width
DPS-4487	Crash when loading an XML file in a French environment
DPS-4491	Crash may occur on a second Merge Column operation
NEW FEATURE	Amazon EMR Hive, Google Sheets, Google Drive and SugarCRM Connectors added
NEW FEATURE	Easily jump to the change which created the selected column
ENHANCEMENT	Option to Create a "New Workspace" From the Menu Dropdown
ENHANCEMENT	Show field type on field list items on calculated field expression editor
ENHANCEMENT	SAS Transport open filter should support both .xpt and .stx extensions
ENHANCEMENT	If you have two tables selected give a context menu option to auto-stage and open the join dialog
ENHANCEMENT	Save to Swarm Improvements
ENHANCEMENT	Allow more width to runtime parameters dialog on workspace open
ENHANCEMENT	Application or Workspace Runtime Parameter sections are now hidden on open workspace if there are no relevant items
ENHANCEMENT	Filter Redesign
ENHANCEMENT	Show all available timezones
ENHANCEMENT	Ability to create a new library file
ENHANCEMENT	Change "Remove Column" to "Delete Column" and add "Delete Columns" to the main drop down for multi-select deletion
